## Update on the Bo Children’s Hospital

We have attached some photos of the Laboratory showing a technician recording results and another preparing blood samples

## ***New bus urgently required for transportation of patients and staff***

18 months ago, a second hand VW minibus was donated to the Bo Children’s Hospital, unfortunately it has been very unreliable and breaks down regularly. These are the words of Dr Wasu Sannoh, Chairman of the Bo Children’s Hospital Board:

“The effect of all this is that we have no vehicle this (heavy) rainy season. Staff cannot be punctual and patients find it difficult to visit us. We are just coming out of a severe national fuel shortage which increased transport costs up to three times. This has caused a lot of anguish and we are under even more severe pressure in that section.”

## **Inter Care Charity UK**

Inter Care Charity in the UK through Professor Peter Jones has donated medical equipment including medicines and hygiene materials. A lot of these items are not available in Sierra Leone and have been a great help to the staff in their day to day work.

Some of the consignment pictured below with Hospital Superintendent, Vandi Sombie
